Subject: unfair for microsoft

if i were a judge, this case would have been thrown out before it ever became so ridiculous. it only goes to show what our gov. is really made of. its a shame that the gov. doesn't really represent the people. any fool can see that its all about money. microsoft has it and every so called company including thier gov. wants part of it. it doesn't pay to futher yourself in this country unless your a politician or a judge. needless to say i think microsoft is a great co. and good for america.

thank you
